Peabody Energy Corporation engages in coal mining business in the United States, Japan, Taiwan, Australia, China, India, Vietnam, South Korea, and internationally. The company operates through Seaborne Thermal Mining, Seaborne Metallurgical Mining, Powder River Basin Mining, and Other U.S.

Thermal Mining segments. It is involved in mining, preparation, and sale of thermal coal primarily to electric utilities; mining bituminous and sub-bituminous coal deposits; and mining metallurgical coal, such as hard coking coal, semi-hard coking coal, semi-soft coking coal, and pulverized coal injection coal. The company supplies coal primarily to electricity generators, industrial facilities, and steel manufacturers. As of December 31, 2020, it owned interests in 17 coal mining operations located in the United States and Australia; and had approximately 3.0 billion tons of proven and probable coal reserves and approximately 450,000 acres of surface property through ownership and lease agreements. The company also engages in direct and brokered trading of coal and freight-related contracts, as well as provides transportation-related services, which involve financial derivative contracts and physical contracts. Peabody Energy Corporation was founded in 1883 and is headquartered in St. Louis, Missouri.

BlackRock Capital Investment Corporation, formerly known as BlackRock Kelso Capital Corporation, is a Business Development Company specializing in investments in middle market companies. The fund invests in all industries. It prefers to invest between \$10 million and \$50 million and can invest more or less in companies with EBITDA or operating cash flow between \$10 million and \$50 million. The fund invests in the form of senior and junior secured, unsecured, and subordinated debt securities and loans including cash flow, asset backed, and junior lien facilities and equity securities. It's equity investments can be structured in the form of warrants, preferred stock, common equity co-investments, and direct investments in common stock. The fund's debt investments are principally structured to provide for current cash interest and to a lesser extent non-cash interest, particularly with subordinated debt investments, through a pay-in-kind (PIK) feature. It can also make non-control investments.

Antero Midstream Corporation owns, operates, and develops midstream energy infrastructure. It operates through two segments, Gathering and Processing, and Water Handling. The Gathering and Processing segment includes a network of gathering pipelines and compressor stations that collects and processes production from Antero Resources' wells in West Virginia and Ohio. The Water Handling segment delivers fresh water; and offers other fluid handling services, such as wastewater transportation, disposal, and treatment, as well as high rate transfer services. The company was incorporated in 2013 and is headquartered in Denver, Colorado.
